Meeting Minutes November 23rd, 2022

Occupational Therapy changes at the school level

The transition is to the P4C (Partnering For Change) model in September, 2022. In the P4C model, services are delivered along a continuum of tiered services:

- Universal Tier One services are designed to help all children in the classroom.
- Targeted Tier Two services provide additional support to children who are struggling despite the initial recommendations.
- Individualized Tier Three services are offered to children with more complex needs.

What this means for us:

- An OT is assigned to our school to provide regular and consistent services (1 day every 3 weeks).
- The OT will also provide the school with a documentation binder (this will be in the office) to maintain centralized information and provide a method of communication to teachers and school personnel.
- To proceed with this transition to the P4C model, SBRS requires that all families are contacted, notifying them of the program and informing them of a blanket consent for the OT to observe their child in the classroom and provide universal strategies to their teacher to benefit all students in the learning environment. This was completed through School Day already.
